

Invitation to Water Network for Water Professionals

Dear contact,

I want to introduce www.waternetwork.info to you.

It is an internet based contact tool **for water professionals around the world.**

WaterNetwork gives you the possibility:

- *to have your existing network on-line available*
- *to develop your professional network*
- *to search for water expertise worldwide*

LINKit consult and Wanningen Water Consult from the Netherlands have developed it the last year

as we needed a specialized tool to manage our growing network.

May I ask you to list yourself as well as member of WaterNetwork and see if the tool is useful to maintain your network? To be found by others you should **fill your profile and add some projects and link them with the search criteria.** It is for **free, secure**, you manage your **personal profile** and can have **your water network online available**...So, no more problems with lost business cards....!

You may be invited by somebody else as well. If this causes any inconvenience we apologize for that.

Note: it is possible that the confirmation email ends up in your SPAM inbox....

Thanks and best regards

Jeroen van Herk
