

CoastLab Teaching Autumn School

November 26-29, 2007 | FEUP | Porto - Portugal

Applications accepted until August 31, 2007

http://webpages.fe.up.pt/ihrh/pocoast/clab_school/

CoastLab network - the network for small and medium coastal engineering laboratories - with the support of ENCORA Young Professional Exchange Program (YPEP) will organize the "CoastLab Teaching Autumn School", which will be held at the Faculty of Engineering of the University of Porto - Portugal, from November 26 through 29, 2007.

This Teaching Autumn School is designed as a hands-on application-oriented training course. It will provide the students with the knowledge necessary to apply physical modelling to a wide range of port and coastal protection applications. The course covers a wide range of issues from wave generation to wave-structure interactions. As far as possible, students will also learn to use laboratory instrumentation.

Applications will be accepted until August 31, 2007, application procedure and other relevant information is available at http://webpages.fe.up.pt/ihrh/pocoast/clab_school/.

The organisers of the CLab Teaching Autumn School would also ask you to pass this message on to any colleagues/students who may have been missed by this mailing.

Look forward to welcoming you in Porto!

Yours sincerely,

Luciana das Neves

On behalf of CoastLab network
