

Ditte Marie Mikkelsen

Ditte Marie Mikkelsen has been employed at Rambøll since 2008. She holds a master's degree in Biology, specialising in the marine environment. She is specialised in Environmental Impact Assessments (EIAs), Natura 2000 assessments and environmental monitoring. Through her work, she has obtained specialist knowledge of environmental rules and regulations. From environmental desktop studies and biological screenings (e.g. with ROV) to authority applications, she has both national and international professional experience.
