Nordic Workshop on Marine Spatial Planning

6-8 June 2007, Copenhagen, Denmark

- **Mapping tools for integrated management**
- **Essential habitats and ecological coherence**
- **Fisheries perspectives in area-based management**
- **Nordic approaches to marine spatial planning**

The workshop aims to address Nordic perspectives on marine spatial planning and discuss strategies, tools and approaches for better integrated management of the Nordic marine environment.

Workshop sessions will present and discuss new research findings, incl. GIS-applications, and Nordic case studies and practices related to habitat mapping and area-based management, marine zoning and Marine Protected Areas. The 60-80 expected participants will include managers and researchers from the Nordic countries together with Nordic and other international speakers.

The workshop is organised jointly by Nordic MPA Forum, Danish Society for Marine Biology, Danish Institute for Fisheries Research and Danish Forest & Nature Agency in association with a range of partners. The workshop is supported by the Nordic Council of Ministers.
